

# FLIGHT HEAD COMPACT

## Revolutionizing Stability: The Flight Head Compact

The Flight Head Compact features a 3-axis gyro-stabilized design that eliminates vibrations for a smooth picture with 10-200mm film lenses. It includes new Electronic Holds on all axes and a True Gyro Horizon, operated via joystick or hand wheels. Weighing only 55lbs, it is perfect for cranes, camera cars, boats, and remote dollies, with flexible mounting options.
